

SOIC Regional Economic Indicators: *Total Wages*

By: Fui Phang, Leia Moore and Lisa Rockett

February 2008

Seventeen of the twenty business sectors in the SOIC region contributed to the total regional wage increase in 2nd Qtr 2007 from the previous year. Total regional wages increased 5.68% (\$68.42 million) between 2nd Qtr 2006 and 2nd Qtr 2007, of which the Arts, Entertainment, and Recreation sector managed the greatest percentage gain in total wages (35.92% or \$4.94 million), followed by Professional, Scientific, and Technical Service sector (16.90% or \$4.99 million), the Mining sector (12.84% or \$13.16 million), and the Transportation and Warehousing sector (12.46% or \$6.30 million). Over the past quarter, total regional wages increased 3.94% (\$48.23 million).

To preserve the anonymity of establishments, the Bureau of Labor Statistics withholds publication of data for any geographic industry level in which there are fewer than 3 firms or in which the employment of a single firm accounts for over 80% of the industry. Because the CEED is reporting the information over a 20 county region rather than individual counties, the SOIC region will include the nondisclosable data beginning in 1st Qtr 2006. However, sectors 51 and 55 have gone back and are now reporting the nondisclosed data beginning in 1st Qtr 2002. It is important to remember that
