

Imation Corp. is recognized as a leader in removable data storage media - from corporate data centers, to networks, to small businesses and home users. The name Imation combines the essence of the company's core business of information management with its central values of innovation and imagination.

Imation's Corporate Headquarters with our new high technology R&D labs are located in Oakdale, Minnesota. Manufacturing sites are located in Arizona, California, North Dakota, Oklahoma and Wisconsin. Imation has a presence in 60 countries around the world.

Imation has repeatedly won corporate awards from various organizations including '100 Best Companies for Working Mothers' by Working Mother magazine; 'Most Admired Companies' by Fortune magazine; 'Minnesota's Best Employers' in Corporate Report; and IndustryWeek Best Plant award for its Wahpeton facility.

Imation employees share in the company's success. Through a corporate philosophy of shared rewards-competitive salaries, incentive and bonus plans, stock options, comprehensive benefit packages-hard work pays off. Imation Corporate Headquarters provides an on-site Fitness Center, Employee Assistance Program and Full Service Cafeteria. Imation takes pride in providing employees a great work environment, but even the best job is only a part of your life.

Imation seeks a Coating Process Engineer to support the installation, scale-up and production of linear tape products at the Weatherford manufacturing facility, approximately 60 miles west of Oklahoma City. Duties include the scale-up and process understanding for the coating, web handling, orientation, and drying processes. Emphasis on process development, optimization, productivity, and cost reduction in a manufacturing environment. Responsible for establishing and ensuring process capability and understanding. Emphasis on product and process yields, product quality, and equipment runtime improvements. Maintain accurate documentation to reflect operating procedures and product structures in accord with ISO-9002. Lead cross-functional process improvement teams with the Process Technology and R&D organizations at Oakdale. Communicates changes in process through technical reports. Maintain project schedules and reports status to management.

Previous experience or technical training in coating, web handling, drying, orientation and process safety in a manufacturing environment preferred. Strong problem solving, data analysis, and decision making skills required. Applied knowledge of statistical based analysis tools including Six Sigma, SPC, control charting and capability analysis utilizing Cpk/Ppk methodology. Effective time and project management skills to successfully prioritize and manage multiple projects with minimal direction. Strong written, presentation, and oral communication skills. Solid interpersonal and team building skills.
